

What to do After a Hailstorm?

Inspect your Property

Check for obvious signs of damage (shingles, siding, windows, gutters). Pay attention to dings, cracks, and missing pieces.

Document Damage

Take clear, high-resolution photos of affected areas to support potential insurance claims.

Get an Inspection

Not all damage is visible to the untrained eye. Schedule an inspection with a certified roofing contractor to identify hidden problems.

File your Claim

Submit your photos and inspection report to your insurance provider promptly to avoid missing deadlines.

Schedule Repairs

Fast action ensures minor issues don't escalate into costly structural repairs. Delayed claims result in 25–50% of denials per year (Insurance Information Institute).
